

Operating procedure for the GO charge zone with charging stations:

1. **Online reservation:** Due to limited capacity, please always make a reservation through the website www.goparking.cz (not applies to chip card holders).
2. **Entry into the GO charge zone:** The GO charge zone is located opposite to the main parking entrance. This zone is specifically designated for vehicles requiring charging (electric cars). Before entering the zone, enter the PIN code for entry and take a parking ticket.
3. **Parking at the charging station:** Upon entering the GO charge zone, park in an available parking space with a charging station. Park your vehicle in a way that allows easy connection to the charging device.
4. **Connecting the vehicle to charging:** After parking, connect the vehicle to the charging station using the charging cable. Ensure that the vehicle is properly connected, and charging has been initiated.
5. **Transportation to Prague Airport:** After connecting the vehicle to the charging station, wait at your vehicle; the GO parking driver will automatically pick you up and take you to the airport.
6. **IMPORTANT:** Keep the keys to your vehicle with you throughout the parking period. The vehicle will remain connected to the charger and will not be manipulated during your absence.

If all charging stations are occupied, please contact +420 773 600 699 (shift supervisor).

There are 20 Type 2, Mennekes charging stations (AC up to 22kW/32A) and 4 AC 1-phase 230V charging stations available. The vehicle is guarded by physical security 24/7 and a modern camera system.
